Height of U.S. Has Not Changed Page Navigation Main Profile At A Glance Height of U.S. Has Not Changed For the past 100 years, average height in the U.S. has remained steady. The CDC reports today, we're just as tall today as we were in 1900, at 5'10.7" - the same as we were in the 1980s. What's more, the number of 5'6" to 5'8" people has increased by about 50% since the early 1980s. There are a couple of theories about why average height doesn't change: Our genetics haven't f678ea9f9e
