Despite the bad reviews

This is by far one of my favorites.

A very nice and calming main soundtrack.

An interesting story that is presented well in my opinion.

But a very small amount of time is taken to get to most of the endings.

This is what most people find bad about this game.

It is

And I repeat

It is NOT a 3 minute game.

There is about an hours worth of playtime in this game if you read the text carefully and are working to get the achievements.

(And I am one of the people who, after having to repeat multiple choices, skipped the dialoge)

However I do see some people have around 3 hours worth of playtime.

I'm not actually sure how that works but moving on.

This game is not one for someone looking for HOURS worth of playtime and an amazing story.

This game is for someone who wants something to kill time with

Nice music

Interesting story (though this is very debatable)

But a short playtime and not having to invest in an entire story.

I must admit the price is slightly high for a game of such short playtime but that is a developers choice.

Overall I personally would be thrilled if the developers decided to add more endings.

Maybe if the playtime went up this game would have much better reviews like it deserves.

6/10

Most people would find that bad but that is my overall opinion, trying not to be too biased by my own interests.

Anything over 5 is good and recommended.

Anyone want a game to kill some time with that has a nice story and good soundtrack? Right here.

Anyone want a game with a lengthy story and hours worth of playtime? Go find something else, this is not right for you.

Simple as that.. This game is really fun to play :D

I love its tuny style and the simplicity!! The more you progress the harder it gets. Theres so many mechanics well thought through and so many puzzles I didnt think of at first. And its really fun to progress. I thought it was gonna repeat the same patterns, but its very diverse throughout the game!!

It sucks that there is no exit option other than alt+f4 and no pause menu, but its in alpha after all, so cant complain.

Definitly recommend this game, its really fun to play !!!!

Pros:

- simplicity

-
- always new patterns and very diverse
 - music\vtune
 - many levels
 - fun to play

Cons:

- no pause menu
- no exit option other than alt+f4. Can't get this one to run, keep getting a fatal error come up.

I think my Graphics card needs updating so please check your system requirements before buying it.

Dash. i took this game so serious as a kid it's making me laugh as an adult 20 odd years on. i got nothing but love and praise for this game.. Hey guys when you offered me this game you wanted to no when i uploaded a video of it well i have posted a video of some gameplay of the video and plan to do another one at a later date with commentary to adress some things that are wrong with the game the game is pretty good it really is but it could be lots better i no its only Early Access but i will give my full opinion on the game in another video this video was to prwetty much show people what its like in a match but since that its only early access i will rate this up since its better than most early access games iv played

Heres the link you guys wanted as well

<https://www.youtube.com/watch?v=tZ3dSfSGPAw>. This game has major problems that are never fixed by updates. In fact, every update seems to amplify the problems. After occasionally booting up this game over the course of a few years, I've finished exactly 2 games. The rest ended in crashes. If you're looking for a good 3D chess game, look elsewhere!. What is this

I'm not kidding, it's a bad game

Game seems OK however I cannot calibrate my G27 wheel. When trying the menu jumps around erratically, I can't select items properly which leaves me trying to play with very twitchy steering. Turning the wheel 90 degrees results in hairpin turning. Apart from this the experience seems fun, don't think it's worth full price though. I've played this one through three times from start to finish and still feel like there's still something waiting for me to discover. A very good read, interesting characters, but I think the most interesting character might be overlooked by the casual player.

I'm still looking to win over the Heart of the House =). I love this game. And highly recommend getting it. I have played all most all airport games and so far as airport games go this is one of the best. Yes I know it is not a build your airport like the tycoon games, but for a one man job it is very well done. The game has so much potential, and seeing that he is working on new airports and planes I think it will go a long ways. A very interesting concept that it executed in a very skillful way. This game also has big potential if it keep being updated as there still are a few bugs in the game that I have noticed during my 90+ minutes of playtime.

And there is no push for micro-transactions that I have discovered yet.

This game also has a very pleasing art style that is gentle, dark and easy on the eyes.

The one thing I would like to be done better is marking which minions in your army need to get their ability in a match as I often forget what my units need to use their power-ups.

Overall it's a very good game with a few minor bugs. I would recommend this to a friend.. OMG !! 1 move per 72 hr ??? see you tomorrow.. I don't know if it is my computer or the game but since the 1.2 update, the new minigames are making the fps drop so much. Great classic harvest moon game. Not only "No".. but "Oh Hell NO!" Stay away from this toxic minimal effort game by the developer at ALL costs!

<https://www.youtube.com/watch?v=dN4fhwchGUM>

This is kinda what you'd expect from your typical Game Guru game. Drag and drop default assets within Game Guru engine and hope to make a quick buck kinda game by the developer. Except.. this one is EVEN WORSE than most Game Guru garbage I've seen. Less effort and less care by the developer is blatantly obvious, yet he asks THREE TIMES as much as your average Game Guru trash game (Average is about \$1.99 USD and for this he asks \$5.99 USD)

Maps look like they were made in no more than five minutes each with the same three or four assets used over and over and over and over. Absolutely ZERO thought put into any of the levels and each looks as if a drunken monkey created them as a joke. Add to this that the game crashed three times on me with a black screen. (And before the developer can blame my computer or Steam.. my Steam big picture and overlay was turned OFF before the game and my computer can handle ARK and 1,000 other games with no problem)

At least Ivan Vs Nazi Zombies (which has been removed from Steam might I add) was only \$1.99 and I could play the full game, not possible with this trash as it kept loading my saved game after getting killed to a black screen with game sounds. Ugh. This game just isn't worth the hassle or time, much less even a nickel of your money.

My Score:

VALUE: 0 out of 40 - A game that a developer spends no more than 20 minutes making and charges \$6 for? Cough. Ridiculous. Way to disrespect any fans you might have made in your previous games, mr greedy dev. ...ZERO!

FUN: 0 out of 30 - If you think feeling nausea at the blurry stretched terrain and awful controls "fun", more power to you! ...ZERO!

CONTROLS & BUGS: 0 out of 20 - With random invisible walls everywhere and constant black screen bugs, 0 is more than this game deserves here.

GRAPHICS & SOUND: 0 out of 10 - There's no points awarded for using stretched default textures and assets we've seen 100 times.

So what would look to add up to a 0 score because afterall, 0 + 0 + 0 + 0 equals 0 right? Usually! But not in this mess of a rip off scam game! I confidently take away 20 points for wasting my time installing, uninstalling, and needing to request a refund, and needing to seek professional help for ever thinking this was game worth a purchase! Subtract 20 points!

My Score: The lowest score I've ever given to any game in just about 300 Steam reviews now.. A NEGATIVE 20 %

Great Job Mr Self proclaimed "Developer"! Way to prove you are an indie developer only interested in ripping off your customers with low effort garbage. {applauds}
