Ezen a gépen el sem akar indulni.... Lots of loud noises, couple decent scares or moments where i felt too worried about an incoming jumpscare to turn my head :P Not bad but mostly just a walking simulator through very similar corridors. Takes just about 30mins to finish. Not as scary as Amnesia and nowhere near as good a story as Chair in a Room: Greenwater. Does what it sets out to you so if ya up for a quick scare - go for it :). More, please!. Great story would recommend :). crashed my windows, BSOD on next restart, luckily windows couldrepair startup. probably not even tested on a thinkpad t410 laptop.. This is a must have just to show people VR. Love the reaction.. Since this is only the demo I'm only saying what I've got from that. I don't really understand why this got mostly negative responses. It's a pretty good VN. I never liked voice acting in VNs so I always turn the voices off so I can't comment on that, but the art is nice, love the soundtrack and the story makes me want to play the full version, however I'm still contemplating whether to get it or not. It's unique, a bit confusing but easy to understand and I'm sure it progresses in the full version of course. Cyrus looks like a chick, I really thought he was a girl at first, but hey nothing wrong with a feminine looking guy!

If Othello was an arcade shooter.. If you are lucky enough to even get this game to start, there is a good chance the game will crash when doing a basic jump. And after the struggle to finally make it run, the game itself is pretty stale. Sometimes the player(the cube) moves a pretty normal speed, sometimes it flies through the map like a jet and sometimes it seems like you don't move at all. Having no or barely any control over your cube in a precise platformer isn't the most fun experience. The soundtrack is pretty neat, too bad that it loops every 30 seconds.

It's a cheap pricetag, but I think you are better off playing free platformers on various internet sites. Can't really recommend it.. By far the worst strategy game I have ever played. Horrible graphics, long set-up for resolution and other options, no campaign map, bad camera control, and bad combat animation. For a 2010 release this is a poor excuse for a strategy game. If you want a good medieval strategy with better overall gameplay get Medieval II: Total War. If you really want this game buy it when it is on sale not at full price, it's a waste of money.. This is not a terrible game but for my taste it feels too basic, it reminds me of something you could find for free on flash games websites 15 years ago. I have finished campaign in 3 hours. Second part of the game I played without actual need to lead my troops and just allowed AI to handle all the battles. I have not found any ability to upgrade units and building upgrade system is very limited. So if you go for strategy or upgrades you will be most likely disappointed. This game has the "a-ha" moment nailed down perfectly for me. Every puzzle seems labyrinthian at first until the pieces get moved around, then a cleverness (and for me, sometimes luck) will get you through. The chilled out aesthetic definitely helps with making what some people would call stressful relaxing.. Loved the idea at first sight even though I can't type. I bought the game because the trailer said "rookie" mode and waved a controller around, so I thought I could play it like a bullet hell without the typing BUT THAT IS NOT THE CASE. Very misleading trailer, but the title wasn't lying it's a game for typists only. Also misleading is the amount of level and side stuff. NO REAL levels or enemies, and NPC's or objects don't lead anywhere or do much of anything. I think a FULL GAME with collectables and secret levels and typing segments in boss battles or as an optional mode would sell this game to more people. I would recommend this game to those who can type, and everyone else get help from Mavis. maybe this'll be ported to android someday.. Unbelievable how underrated game this one is...

- Handmade graphics
- Beautiful and fitting soundtrack
